

# EPA PERPETUALLY "UNAWARE"

Jan 09 2001  
Clifford E Carnicom

The following letter has recently been received from the office of Carol M. Browner, Administrator of the U.S. Environmental Protection Agency. This further records the state of unawareness that Carol M. Browner remains in, despite initial notification of accumulating evidence on the chemtrail issue on Dec 09, 1999, more than one year ago. A chronology of the communication between David Peterson, myself, and the EPA is available on this website. Throughout the last year several correspondences have been received which continue to use the phrase that the EPA is "unaware" of any aircraft aerosol operations being conducted across the nation. In addition, Carol M. Browner and the office of the EPA refuses to acknowledge the existence of a physical sample sent to her by certified mail on June 20, 2000, and there remains a patent refusal to identify that material as requested and to release the results of such testing to the American public.

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY  
WASHINGTON, D.C. 20460

DEC 21 2000

OFFICE OF  
PREVENTION, PESTICIDES AND  
TOXIC SUBSTANCES

Clifford Carnicom  
P.O. Box 4653  
Santa Fe, NM 87502

Dear Mr. Carnicom:

This letter responds to the many identical letters dated October 31, 2000, and addressed to Carol M. Browner, Administrator of the Environmental Protection Agency, and others regarding the issue of "aerial sprayings occurring over the United States." As you know, these letters were generated from your website [www.carnicom.com/contrails.htm](http://www.carnicom.com/contrails.htm). The Administrator asked that I respond to these letters for her.

These letters and information on the above website claim that aircrafts are spraying chemical, biological or other toxic substances from high altitudes over the U.S. and harming people. As you are aware, the Agency's Office of Air and Radiation (February 22 and 25 and June 2000) and the Office of Pesticide Programs (December 9, 1999) have responded to prior correspondence from you about these same claims.

EPA is not involved in or aware of any application or aerial spraying of chemical, biological, or toxic substances as claimed by your past correspondence or on the above or other websites. The Agency takes very seriously its mission to protect human health and the environment from toxic substances and to carry out and enforce laws pertaining to this mission. The activity described in your communications is obviously contrary to our mission and responsibilities. Illegal applications or releases of toxic substances are investigated by enforcement authorities at the federal and/or state level(s) and enforcement action is taken, if appropriate, according to the evidence and investigation. Since you believe the aerial contrails are a result of illegal releases of chemicals or biological substances, you may wish to contact the appropriate state regulatory agency for their consideration.

The Agency tries to respond to all correspondence however, to conserve resources I suggest that you post my response on the above website as a means to more efficiently respond to the many individuals who sent your form letter.

Sincerely,

Jay Ellenberger, Associate Director  
Field and External Affairs Division  
Office of Pesticide Programs
